# Hanging Seagull Mobile
Setup & Care Guide

📦 Unpacking & Checking

🔺 1 x Assembled Seagull Mobile

🗄 1 x Hanging Hook (ceiling mount)

🗐 1 x This Guide

Handle with Care: Please unpack your mobile gently to avoid bending the wires or tangling the elements. Lay the mobile carefully on a flat surface while preparing to hang it.

Available Sizes

Our Seagull Mobiles come in various sizes to fit your space

| 16 cm | 23 cm | 29 cm | 35 cm |

🧳 Installation

1 Choose Location

Select a suitable spot, ideally indoors or in a sheltered outdoor area (like a covered patio). Ensure there is enough clear space around it for the mobile to rotate freely without hitting walls, furniture, or plants. Allow approximately 50 cm (19.7") width for movement.
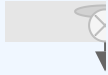

2 Check Height Clearance

Consider the mobile's body height (approx. 54 cm / 21.3") plus the length of the hanging line. Ensure it hangs at your desired height and is clear of obstructions below.

3 Install Hook

Securely install the provided Hanging Hook (or another appropriate ceiling hook) into a solid ceiling point (e.g., a beam, joist, or suitable anchor). Please ensure the hook is installed correctly and can support the mobile's minimal weight.

4 Hang Your Mobile

Carefully lift the mobile by its topmost loop or hanging point. Gently place the loop onto the installed ceiling hook.

5 Allow to Settle

Let the mobile hang freely and untwist if necessary. It is balanced to move gracefully with gentle air currents.

🎧 Care & Enjoyment

Enjoy the Movement:
Watch as your seagulls gently "fly" and turn, adding a calming, artistic touch to your space.

Cleaning:
Gently dust the elements with a soft, dry cloth or a feather duster as needed. Do not use water or cleaners, as this may damage the wood or finish.

Avoid Strong Drafts:
While designed to move in gentle breezes, place away from strong, direct drafts (like open windows or powerful fans) which could cause excessive movement or tangling.
